TERMS

ALL GOODS ARE SOLD F. O. B. CARS FACTORY, and shipments in transit are at purchasers' risk.

Prices are subject to change without notice, and all invoices will be rendered in keeping with conditions under which orders are acknowledged and accepted.

Invoices are payable at Net in thirty days in New York or Boston Funds or a cash discount of Two per cent. may be taken if settled within ten days from date rendered.

All Remittances should be mailed to Southington, Conn.

Unless error has been made by us in manufacturing or shipping an order, we cannot accept the return of goods until definite terms for such return have been mutually agreed upon.

All weights shown in this catalogue are approximate shipping weights.

Each page clearly designates where each item is made—whether in the Southington, Conn., plant or the Cleveland, Ohio, plant.

GUARANTEE

Every tool bearing the PEXTO oval is of the highest quality, and thoroughly inspected before shipment. It is guaranteed to perform the work for which it is designed and intended to be used. Therefore, should any defect of workmanship or material develop in a tool which has been properly used, please return it to us for examination and free replacement.

INTRODUCTORY

IN presenting to the hardware trade this Centennial Edition of the PEXTO catalogue covering the largest line of Mechanics' Hand Tools, Builders' and General Hardware manufactured by any one Company, no time, effort or expense has been spared to produce a comprehensive book which would not only be a fitting representative of The Peck, Stow & Wilcox Company covering tools and hardware manufactured continuously since 1819, but also one which hardware buyers may find an indispensable daily help in providing for their requirements covering the list of PEXTO products.

In contrast with previous issues, we have followed closely the present-day idea of concentrating illustrations and descriptions into a double column book, with the advantage of carrying quickly and concisely to the mind of the reader the essential details of the goods catalogued. Also the further benefit of keeping each separate section or line—such as Braces, Chisels, Pliers, Wrenches, Snips, etc.—within as few pages as possible, consistent with the adequate listing of the individual pieces.

In reviewing this catalogue, do not overlook the many advantages which the PEXTO lines offer to you by enabling you to concentrate your purchasing power over a large line of goods instead of spreading it over a number of scattered factories. These advantages are many, and principally because it enables you to establish a large account with one reliable, leading manufacturer, which makes it possible to extend to you from time to time considerations of value to you—not only in making up full freight shipments with relatively limited quantities of various items, but from other angles, such as frequent shipments, having enough goods to go out in each shipment to earn maximum freight allowance, etc.

It will be our pleasure to go over this with you further in detail, because what this concentrated purchasing idea is accomplishing for many of the largest buyers in the country, it can also do for every purchaser of the large lines necessary to the average hardware stock.

TRADE

MARK

To You

It is a mark of quality.

It identifies the manufactured products of
The Peck, Stow & Wilcox Co.

It is a symbol of the highest achievement
of the scientific manufacture of mechanics'
tools.

It is used only on products that are
designed and created by specialists in their
respective lines.

To Us

It is a mark of responsibility.

Established 1819.

DISPLAYS

Preceding their respective sections, you will notice a fullpage colored illustration of the standardized PEXTO selling displays of Braces, Chisels, Pliers, Snips, Screw Drivers, Pruning Shears, Hammers and Wrenches.

These represent but a part of the well directed advertising campaign conducted at all times on PEXTO products and have proven over a period of years that they will continually and profitably sell quality tools for the dealer. They are attractively lithographed in four colors, and equipped for use in the window, on the counter or to fill a wall space. This means quick and profitable turn-over to the dealer; also constant and increasing volume to the jobber who distributes the displays and keeps them filled up. These are selling helps which you cannot afford to ignore, because they have proven, during the past five years that high-grade, quality tools are easily and profitably sold, if attractively displayed.

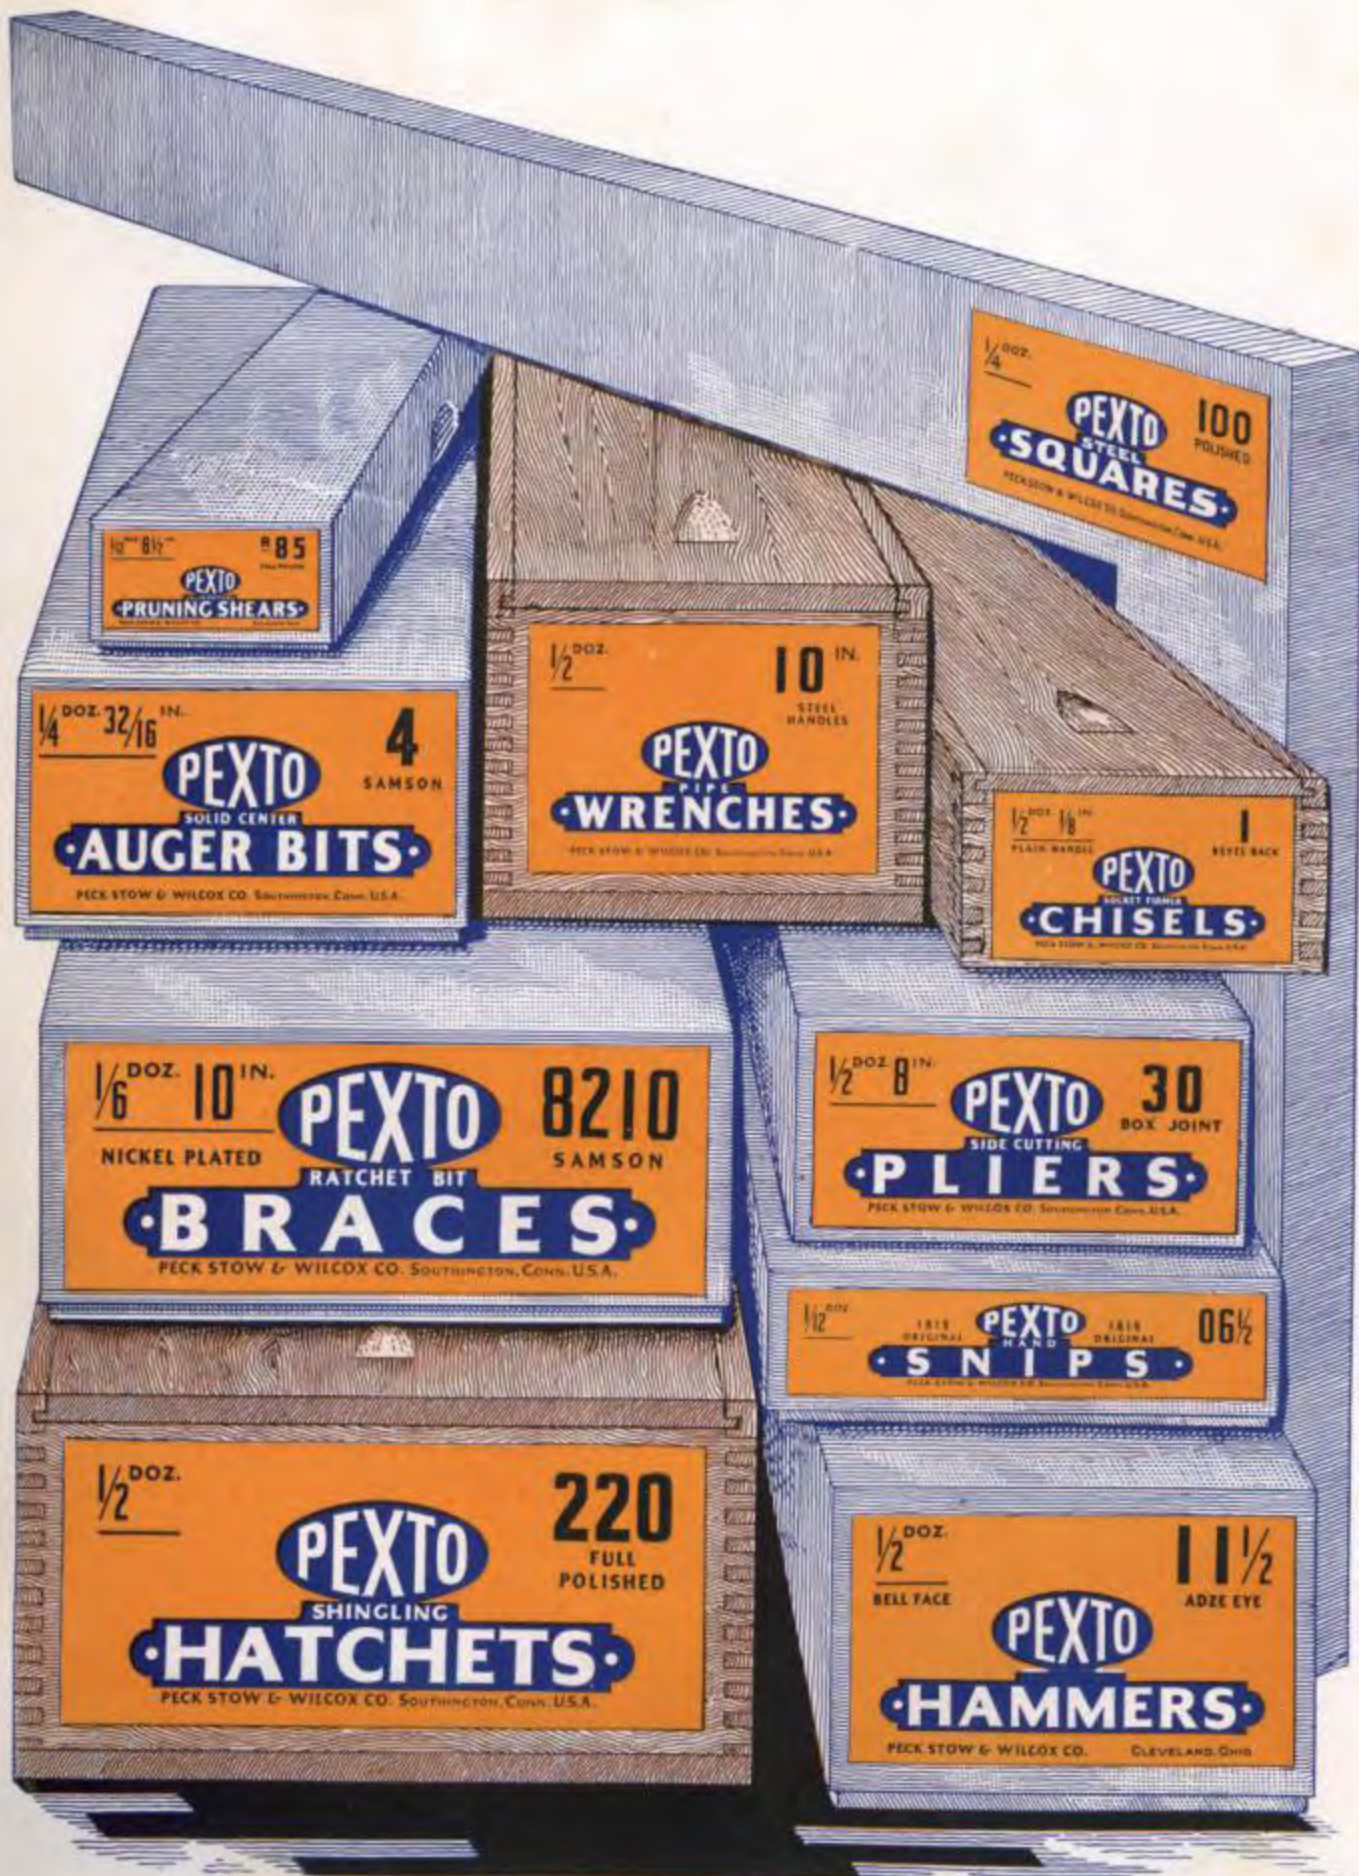

LABELS

Another wonderful PEXTO dealer help is the new PEXTO label de luxe, reproductions of which are shown in colors in this book.

Every PEXTO tool is packed under this four-color label, which was designed by an eminent artist, so as to show clearly at a glance the necessary details of a good label; namely, the item, the number and the size.

Our adoption of this label — was to give both the jobber's stock man and the retail clerk a label which would eliminate errors, save time and make it a pleasure for him to handle the goods.

MORAL: BUY PEXTO TOOLS.

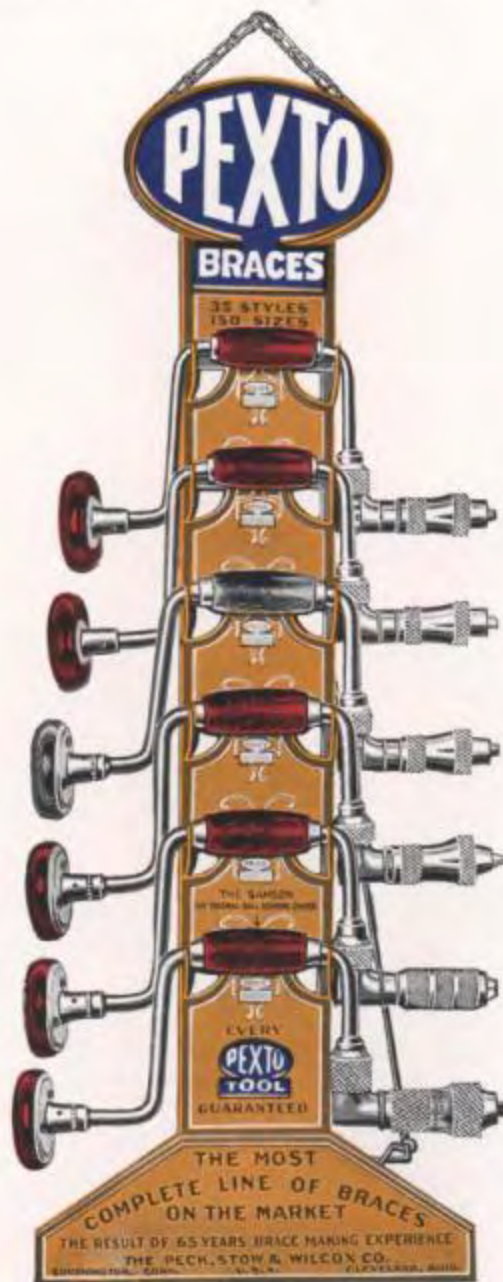

This illustration is a facsimile of our labels as they appear on the boxes.

ASSORTMENT No. 8 PEXTO BIT BRACES

THE Display Fixture is metal and is lithographed in four colors—orange, blue, black and white. It is equipped with wire easel for standing on the counter or in the window and chain hanger for hanging on the wall. It is sent gratis with each Assortment.

PEXTO IS YOUR
GUARANTEE
OF
QUALITY

The Assortment consists of twelve Pexto Bit Braces, six of which can be mounted on the Display Fixture. The Braces displayed are the most popular styles and sizes.

Size 13" x 36½"

The Assortment is No. 8. Order by number. It consists of the following Pexto Bit Braces:—
 $\frac{1}{12}$ Doz. each 8210, 8310, 5010,
 $\frac{1}{4}$ Doz. 5310, $\frac{1}{8}$ Doz. 3910, $\frac{1}{8}$ Doz. 3410.

The Display Fixture is packed in a corrugated box, the Braces packed two in a cardboard box.

The Display and Assortment complete in a wooden case, size 42"x16"x18", weight 60 lbs.

Order an Assortment, the Display Fixture comes no charge.

MADE IN SOUTHTON

BRACES

The First Brace Made in
America in 1850 was a

PEXTO BRACE

Practically every important improvement in brace making since that time has been brought about by Pexto designers.

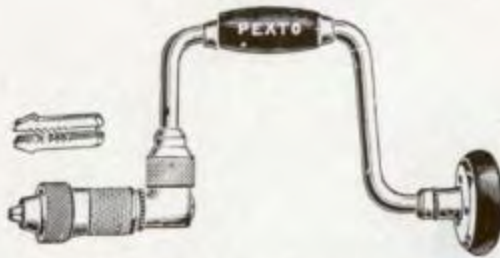

So that nearly three-quarters of a century of experience and constant striving for a higher standard are back of the braces described in these pages — an assurance to the buyer that he is getting the highest quality of workmanship.

PEXTO Braces are distinguished by the details of their construction. The Samson Ball-Bearing Chuck is probably the greatest single improvement in brace making. The Special PEXTO Alligator Jaw is another marked advance.

Most PEXTO Braces have drop-forged steel jaws. Many have steel-clad heads to protect them from splitting and solid steel sleeves with machine-cut threads.

The line affords a choice of practically every style of ratchet or plain brace.

RATCHET BIT BRACES

No. 8200C SERIES, NICKEL PLATED

Samson Brace, Concealed Ratchet Construction

4 " —No. 11—1" " "

3 only—No. 71— $\frac{3}{4}$ " Socket Butt
3 " —No. 71—1" " "
2 " —No. 111— $\frac{1}{2}$ " " Cabinet
2 " —No. 111—1" " "

All the Chisels are Bevel Back and Leather Capped.

The Display Fixture is packed in a corrugated box, the Chisels in boxes of six each.

The Display and Assortment complete in a corrugated carton, size 20"x14 $\frac{1}{2}$ "x4 $\frac{1}{2}$ ", weight 17 lbs.

Order an Assortment, the Display Fixture comes no charge.

MADE IN SOUTHINGTON

ROSE TOOLS, INC.

CHISELS

PEXTO CHISELS, GOUGES AND DRAWING KNIVES, backed by a half century of experience, form the most complete line now on the market and when considering *quality* and *finish* are the equal of any Chisel line made. Superior to many — of course — but second to none.

QUALITY: Pexto Chisels are forged from special crucible steel of the greatest strength and toughness; the sockets are of Norway iron. They are hardened and tempered by special process and will hold a fine and sharp cutting edge as long as it is properly taken care of.

SOCKETS: Are long and deep, of uniform thickness and are well rounded, insuring perfect fitting handles.

HANDLES: Are of selected, seasoned white hickory. They are nicely polished and when furnished in leather caps are fitted with three layers of heavy, live leather.

FINISH: Pexto Chisels are furnished in the celebrated mirror finish, which combined with the polished white handles makes a very handsome tool. All Chisels are ground sharp and with very little honing can be given a fine and lasting cutting edge.

Every tool is rigidly inspected and thoroughly tested before leaving the factory; an added assurance that our customers will receive only quality goods.

PEXTO CHISELS are forged and tempered by the highest grade mechanics — men who have been making Pexto Chisels for a great many years. Therefore, they are absolutely guaranteed to do the work for which they are intended.

Leading the Pexto Line is the Socket Firmer Chisel, the most popular pattern now on the market. It is of the highest quality very attractively finished and has the correct hang. Not only is it valuable to the mechanic, but it is especially useful for all general work and about the house or farm.

Ground wide at the cutting edge and tapers back to the socket, thus allowing easy clearance when mortising.

Pexto Butt Chisels represent perfection attained through years of manufacturing experience. They are correct in every detail from forging to finishing.

They have a short blade and are strongly built; very useful in many instances where limited space will not permit the use of longer styles.

They are especially adapted for use in fitting butts or hinges to doors, cupboards, etc.

Pexto Cabinet Chisels are uniform throughout and special attention is given to every detail; they are nicely finished and are fitted with handles conforming to the general makeup of the Tool.

These Chisels are of the style of the Pocket, but have a lighter and thinner blade, a feature that makes them especially useful on Cabinet or, in fact, all close or fine work.

CARPENTERS' SLICKS

No. 12

WITH 17 INCH HANDLE

Sent in Oval Back only

Length of blade 10 inches

Another high quality Pexto Tool designed especially for smoothing joints when mortising heavy timbers, also for use by ship carpenters.

As the name signifies the Tool is for slick work and when used for smoothing and finishing will perform the same duties as a plane.

When regularly furnished from stock, these Slicks have a fine cutting edge; but when so ordered, they can be furnished at a slight additional cost, honed to a razor edge.

The long handle, 17 inches, with which they are fitted also adds to the convenience of the workman.

SOCKET CORNER CHISELS

No. 32

RING HANDLE

Length of blade 8 inches

The Corner Chisel is one that, due to the peculiarity of its construction, must be made with utmost care, and years of experience make the Pexto perfect in every detail.

It is especially adapted for cutting of corners or angles, and it will produce much better and more accurate corners in mortising than the Framing Chisel.

Page 33

DRAWING KNIVES

No. 5

CARPENTERS'

Width of blade $1\frac{1}{2}$ inches

Pexto drawing knives are forged from special crucible steel and Norway Iron and fitted with heavy ferrules and metal capped handles. The knives are highly polished and are the most popular style now on the market. They are adapted for general work and bear the Pexto guarantee.

Inches	8	9	10	12
Weight, lbs. per dozen..	12½	13	14	16
List per dozen	\$13.50	14.40	15.60	18.00

In boxes of one-half dozen each.

No. 6

COACHMAKERS'

Width of blade $\frac{3}{4}$ inch

The No. 6 Coachmakers' Knife is especially designed for the use of wagonmakers, and is adapted for the shaving of spokes, etc.

Inches	9	10
Weight, lbs. per dozen	10¾	11
List per dozen	\$13.00	14.00

In boxes of one-half dozen each.

No. 15

RAZOR BLADE

Width of blade $1\frac{1}{2}$ inches

Inches	6	7	8	9
Weight, lbs. per dozen..	12	12½	13½	14
List per dozen	\$13.50	13.50	13.50	14.40

Inches	12	14
Weight, lbs. per dozen	18	20
List per dozen	\$18.00	20.00

In packages of one-half dozen each.

No. 17

EXTRA HEAVY SHINGLE SHAVES

Width of blade 1 $\frac{7}{8}$ inches

Inches	12	14
Weight, lbs. per dozen	24	26
List per dozen	\$21.60	25.20

In packages of one-half dozen each.

SQUARES

PEXTO Squares represent that Perfection which can be attained only through years of manufacturing experience, combined with highest quality materials. They possess many exclusive patented features of marked superiority.

The Pexto line includes "The Samson" Take Down Square, The Rafter Framing Square and Standard Steel Squares with all varieties of markings.

An exclusive feature of the Rafter line lays in the markings which are so arranged as to enable the mechanic to secure at a glance just the information desired. With each of these Squares is furnished a booklet of instruction on its use.

Ask for our booklet "How to Use the Rafter Framing Square." It makes the markings so clear that the apprentice can easily understand them.

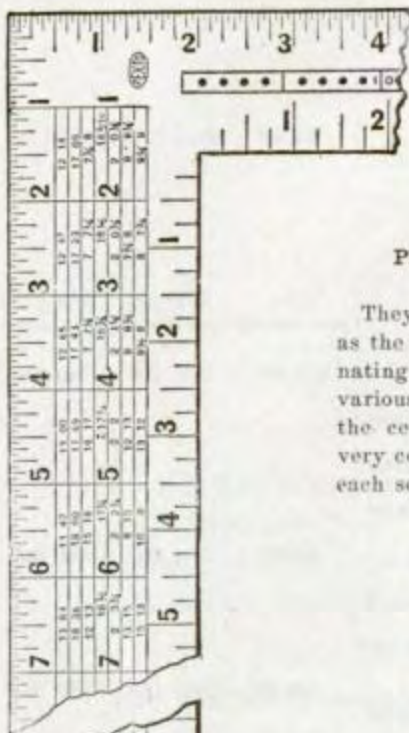

The following pages show the variety and completeness of the line in detail.

STANDARD STEEL SQUARES

RAFTER SQUARES. Two Feet.

STANDARD STEEL SQUARES

**RAFTER
TABLES**

PEXTO RAFTER FRAMING SQUARES

They are the most accurate Squares made, as well as the most convenient for use; the numbers designating the columns of figures to be consulted for various cuts, etc., are very effectively displayed in the center of the body. A book of instructions, very complete and easily understood, is packed with each square.

Run. A to B.
Rise. C to B.
Pitch. Proportion of Rise C-B to width of building A-D, in illustration 8 feet to 24 feet, or $\frac{1}{3}$.

ESSEX BOARD MEASURE

The contents, in board measure, of almost any board or plank, may be read off directly from this scale.

**ESSEX BOARD
MEASURE**

Directions for the use of above Tables and Measures are packed with square.

STANDARD STEEL SQUARES

BRACE
MEASURE

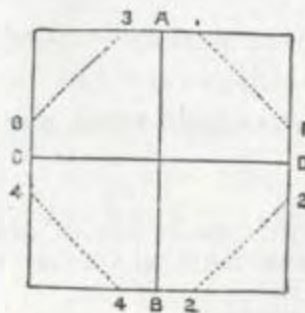

BRACE MEASURE OR SCALE

This Measure is used to determine the length of common braces.

OCTAGON OR EIGHT SQUARE MEASURE

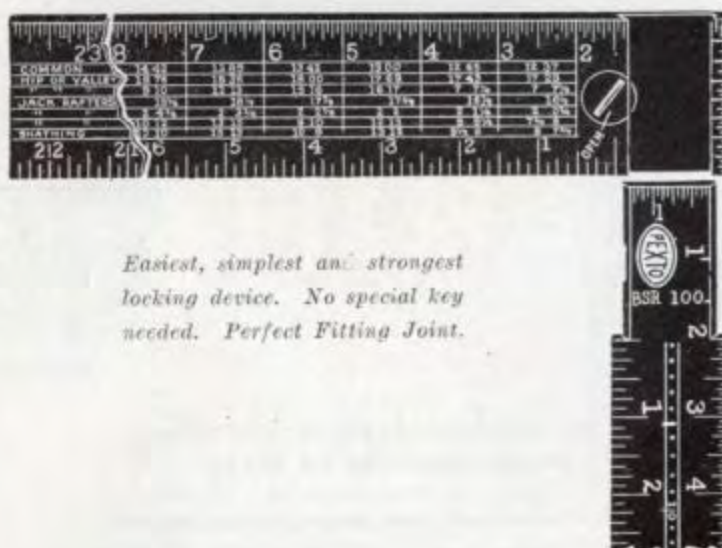

This Measure or Scale is used to make an octagon post out of a square piece of timber.

OCTAGON
MEASURE

Directions for the use of above Measures and Scales are packed with square.

THE PEXTO TAKE DOWN SQUARES

Easiest, simplest and strongest locking device. No special key needed. Perfect Fitting Joint.

This Square must be handled to be appreciated. It has the easiest, simplest and strongest locking device; no special key needed, just a coin, or anything that will fit the groove.

The button that locks the tongue works on a cam and the tongue is drawn against the shoulder by turning the button, as indicated by the arrow. Every time the Square is put together, perfect graduation is insured. Should the joint become loose, the button is so constructed as to take up the wear.

Numbers	Description	Finishes	List per dozen

HATCHETS

OUR line of Hatchets is exceptionally complete, including all the most popular sizes and shapes of shingling and lathing hatchets, claw, half and broad hatchets. Each style can be furnished in a variety of sizes and weights.

The quality of material and workmanship employed in the manufacture of PEXTO Hatchets is that same high standard which identifies all PEXTO products.

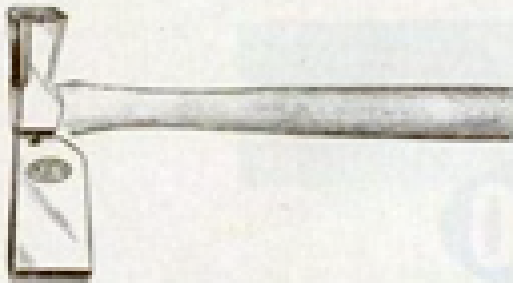

Every Hatchet bearing our trade mark is forged from the best grade of crucible steel, scientifically hardened and tempered so as to combine extreme toughness with maximum hardness. The finish, like all PEXTO tools, is the finest that can be produced.

The handles are made of selected, second growth hickory, thoroughly seasoned and securely wedged into the head. They are shaped to fit the hand and perfectly balanced.

We also make a line of hatchets at slightly lower prices, which are superior in material and workmanship to other similarly priced makes.

In the hands of a workman who does not abuse tools, nor demand of them service for which they are not designed, PEXTO Hatchets will give satisfaction for a lifetime.

LATHING HATCHETS

SEVEN ROW, UNDERHILL PATTERN

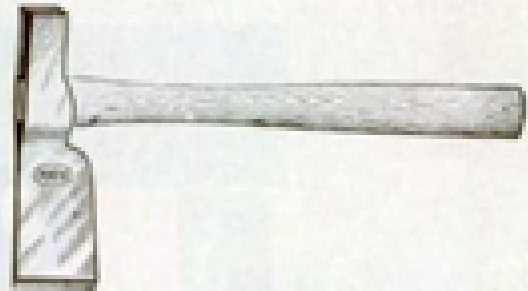

Full Polished, Handles White Hickory

We call special attention to our line of extra creditable steel Lathing Hatchets. They are forged, well tempered, and are finely polished. We can furnish them with slot in the side for pulling nails if so ordered.

No. 131—Width of Bit 2 inches.
Weight per dozen 16 lbs.
List per dozen \$31.00

In wooden boxes of one-half dozen each.

In cases of six dozen each.

SEVEN ROW, PHILADELPHIA PATTERN

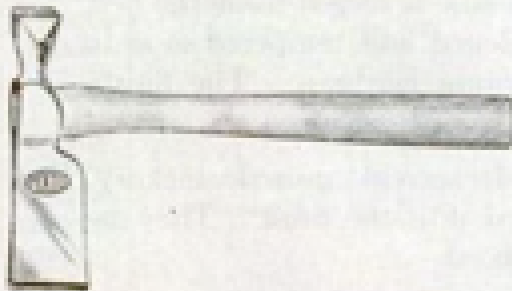

Full Polished, Handles White Hickory

Our high grade Lathing Hatchets are the equal of any made and we unhesitatingly recommend them to the trade as Superior Goods.

No. 151—Width of Bit 2 inches.
Weight per dozen 16 lbs.
List per dozen \$30.00

In wooden boxes of one-half dozen each.

In cases of six dozen each.

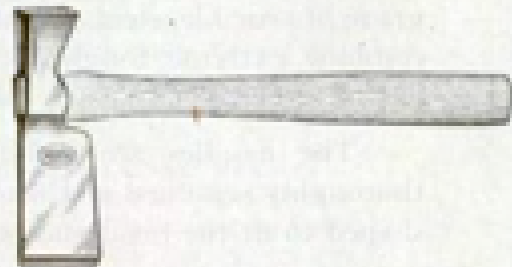

EIGHT ROW, BOSTON PATTERN

Full Polished, Handles White Hickory

No. 141—Width of Bit 2 inches.
Weight per dozen 16 lbs.
List per dozen \$31.00

In wooden boxes of one-half dozen each.

In cases of six dozen each.

NINE ROW, UNDERHILL PATTERN

Full Polished, Handles Extra Heavy White Hickory

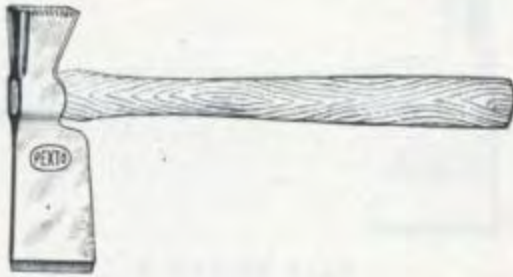

No. 161—Width of Bit 2 inches.
Weight per dozen 17 lbs.
List per dozen \$31.00

In wooden boxes of one-half dozen each.

In cases of six dozen each.

Above weights are per dozen including handles.

LATHING HATCHETS

TEN ROW, UNDERHILL PATTERN

Full Polished, Handles Extra Heavy White Hickory

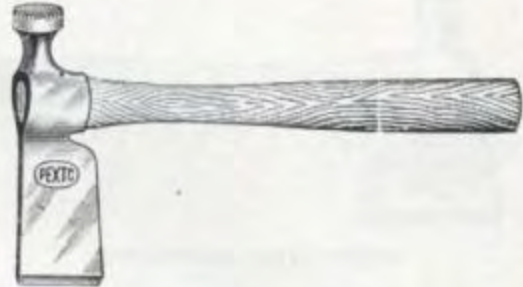

No. 261—Width of Bit 2 inches.

Weight per dozen 18 lbs.

List per dozen \$33.60

In wooden boxes of one-half dozen each.

In cases of six dozen each.

EIGHT ROW BELL POLL, HAINES PATTERN

Full Polished, Handles White Hickory

No. 271—Width of Bit 2 inches.

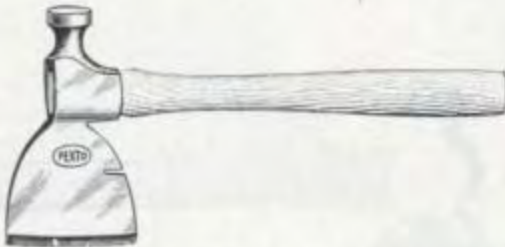

Weight per dozen 17 lbs.

List per dozen 32.00

In wooden boxes of one-half dozen each.

In cases of six dozen each.

SHINGLING HATCHETS

ADZE EYE, BELL POLL SHINGLING HATCHET

Full Polished, Handles White Hickory

Slotted

These Hatchets are forged from the highest grade of crucible steel, are well tempered, have selected white hickory handles, are finely finished and are in all respects a perfect tool.

No. 220—Size 1; width of Bit 3 3/4 inches.

Weight per dozen 20 lbs.

List per dozen \$31.90

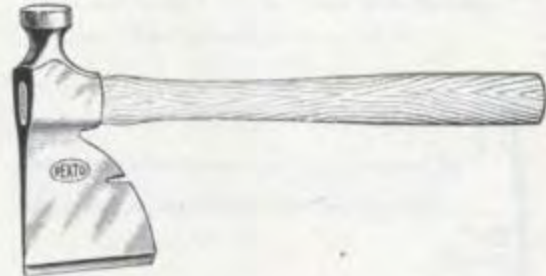

No. 221—Size 2; width of Bit 3 3/4 inches.

Weight per dozen 21 lbs.

List per dozen 33.00

In wooden boxes of one-half dozen each.

In cases of six dozen each.

ADZE EYE, BELL POLL HALF HATCHET

Full Polished, Handles White Hickory

Slotted

These Hatchets are of the same high quality as the No. 220 and No. 221. They are nicely finished and are fitted with selected white hickory handles.

2—No. 91 $\frac{1}{2}$

Assortment No. 2 B Consists
of the following Hammers:—

2—No. 123
4—No. 125
12—No. 126

Each Display Fixture is packed in a corrugated box, the hammers in pasteboard boxes.
Each Display and Assortment complete in a wooden case size 22" x 15" x 9" weight 45 lbs.

Order an Assortment, the Display Fixture comes no charge.

MADE IN CLEVELAND

HAMMERS

THE description under each item illustrated, gives the quality of steel in Heads, and the wood used in Handles.

Tempering is done by the latest improved methods and all Hammers bearing the PEXTO Trade Mark are fully guaranteed.

Finish, lines and balance are essential to good Hammers, and to each of these, the utmost care and attention is given. We call special attention to the individual style of finish on Machinists Hammers—the center part of which was formerly produced in black, is now made up with a beautiful rust proof gray finish.

We make all practical numbers and sizes.

Order an Assortment, the Display Fixture comes no charge.

MADE IN SOUTHINGTON

PLIERS

PEXTO Pliers have no equal for strength, accuracy, and long life cutting power.

They open easily, the cutting edges meet so accurately that they shut out daylight, and every detail of forging, tempering and fitting is as perfect as it can be made.

The famous Pexto Box-Joint is the highest type of Plier construction. This snug-fitting, yet easy working joint keeps the cutting edges true as long as the Plier is in use. It has been rapidly displacing imported makes of Pliers and is everywhere recognized as the last word in Plier construction.

In addition there is a very large and complete line of Pexto Lap-Joint Pliers. These are as good as it is possible to make Lap-Joint Pliers, and are surpassed only by Pexto Box-Joints. They range somewhat lower in price and will be found to give long and dependable service.

From the splendid No. 30 "Star Rivet" Box-Joint, down to the Baby Pattern Splicing Clamp, every type illustrated has all in real value that a century of tool-making experience can put into it.

The line is so extensive and varied that it covers the needs of all expert trades as well as the general requirements of farm and home.

SIDE CUTTING PLIERS

No. 30

"STAR RIVET" PLIERS, BOX-JOINT

Kaurled Gun Barrel Handles

Full Polished Head

The Pexto Star Rivet Box-Joint Pliers represent the highest grade line of Pliers in the world. No other Pliers compare with them for Linemen's use. They open easily; the cutters meet so accurately as to shut out daylight and remain true as long as used. On account of their great strength and fine cutting qualities, the No. 30 Pliers are also well adapted for general use by mechanics or for the household.

In boxes of one each. In cartons of six each.

One gross in a case.

Above Pliers can be furnished Full Polished or Nickel Plated to order, at extra cost.

DIAGONAL CUTTING PLIERS

No. 27

SWEDISH PATTERN, BOX JOINT

Gun Barrel Handles

Full Polished Head

This is one of the handiest of all Pliers and should be in every Electrician's kit. For working on switch-boards, telephone-boxes, around automobiles, boats, engines and other places that cannot be reached by a side cutting Plier, it is unexcelled. It is also a handy tool for the household. Made of the best materials, carefully forged and tempered, it is an exceptionally high-grade Plier.

No. 270

DIAGONAL CUTTING, LAP-JOINT

Gun Barrel Handles
Full Polished Head

This Plier has all the good points, is as carefully designed and is made from the same high-grade materials as our popular number 27. The only exception being that the 270 is of the Lap-Joint construction, and is made in the 5 inch size only. A diagonal cutting plier has many uses around automobiles, boats, and can be used in numerous ways, where a side cutting plier can not be used. This popular type of plier will find a ready sale in all sections.

MILLINERS' PLIERS

No. 99

MILLINER'S PLIERS, LAP-JOINT

Gun Barrel Handles

Full Polished Head

Hole in Handle for Cord or Ribbon

These Pliers are designed for Milliner's use, but can also be largely used in the household, not only for trimming hats, but for other purposes.

No. 99, has the largest field of use in general, having side-cutting jaws and a slender rounded nose, convenient for holding wires, feathers or the stems of artificial flowers; for shaping wires; picking up small objects, etc.

No. 99—5 inches; weight 2 lbs. List per dozen \$18.40

No. 59

MILLINER'S PLIERS, LAP-JOINT

Gun Barrel Handles

No. 9

UNIVERSAL SLIP JOINT PLIER

Knurled Handles

A high quality, nicely finished, tool constructed along lines of great strength. The upper jaw is made so that jaws will adjust themselves to any taper; parallel, round, three square, or half round. This tool will grip a pipe ¾ to 1¼ inches in diameter, and, due to the position of the teeth, it will not let go of a rod. It will also do the work of a parallel plier. Made with Wire Cutter between handles and fitted with a Screw Driver end. Furnished in either Gun Barrel or Nickel Plated finish.

Inches	7
Weight, lbs. per dozen	7½
No. 9—Polished Head and Gun Barrel Handles. List per dozen \$16.20

SPLICING CLAMPS

FORGED STEEL

Full Polished Head
Gun Barrel Handles

These Clamps are forged from Crucible Steel and are especially adapted for Linemen and Electricians. They are thoroughly well made and no pains have been spared to make them an ideal tool.

Especial attention has been given in making these Clamps to have the proper spring in the handles, so that they may be fastened with the loop, without impairing their qualities for holding and twisting connections.

No. 51 Splicing Clamp, 10 inches, for 8 and 14 Brown & Sharpe Copper Sleeves, also for No. 12 Iron Birmingham Wire Gauge Sleeves, and No. 12 New British Standard Copper Sleeves.

Weight, lbs. per dozen 12½
List per dozen \$31.50

FORGED STEEL

Full Polished Head
Gun Barrel Handles

No. 53 Splicing Clamp, 11 inches, with three oval holes for No. 4, No. 6 and No. 8 Iron Wire.

Weight, lbs. per dozen 13½
List per dozen \$36.60

In boxes of one each. In cartons of six each.

REVERSIBLE, FORGED STEEL

Full Polished Head
Gun Barrel Handles

No. 59 Combination Clamp, 10¾ inches, on Sleeve side, same as No. 51 and on wire side same as No. 53.

Weight, lbs. per dozen 14½
List per dozen \$40.90

In boxes of one each. In cartons of six each.

BABY PATTERN, FORGED STEEL

Full Polished Head
Gun Barrel Handles

Our Baby Pattern Splicing Clamps are intended to meet the demand of Linemen and Electricians for a light Clamp for the pocket, and in these are combined all the essential features and merits of the heavier and larger Clamps.

In our line of Splicing Clamps we have adopted such patterns as seem to be most popular with those mechanics for whose use they are intended.

We unhesitatingly recommend them to all Linemen and Electricians.

No. 151 Splicing Clamp, 7 inches, for No. 12 and No. 14 New British Standard Sleeves.

Weight, lbs. per dozen 4
List per dozen \$29.30

BABY PATTERN, FORGED STEEL

Full Polished Head
Gun Barrel Handles

No. 157 Splicing Clamps, 7½ inches, for No. 12 New British Standard and No. 14 and No. 17 Brown & Sharpe Copper Sleeves.

MADE IN SOUTHBINGTON

ROSE TOOLS, INC.

WRENCHES

STRENGTH is the greatest selling point of a wrench. The experience of the best mechanics in many lines and scientific competitive tests have proved that PEXTO Wrenches have greater strength than any other wrenches on the market.

The material and workmanship employed in the construction of PEXTO Wrenches are always of the highest grade, they are properly balanced and made heavy enough to stand up under hard usage. The bars and jaws are of special high quality steel, so forged as to give weight and strength where most needed. The sliding jaw is fitted accurately and our patented method of fastening it over the bar gives added strength instead of proving a weakness.

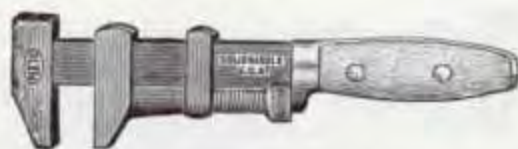

Most of our Wrenches are made under exclusive patents which give to us alone some of the most important principles of wrench construction. We are the only makers that can build a complete wrench from three pieces, and one from three pieces plus the wood facings of the handle.

We manufacture several styles of wrenches. Our Solid Handle Wrench is a most excellent all-round Monkey Wrench for general use; it is very strong and reliable. The Stillson Pattern Pipe Wrenches are made from entirely new patterns and we recommend them, both in quality and finish, equal to any similar wrench manufactured. Our Adjustable Angle Wrench will replace a number of solid wrenches in the tool kit. It is forged from special steel and is full polished excepting the web of handle which is finished in black.

All PEXTO Wrenches are carefully finished and are neatly packed, making them a most attractive line.

SCREW WRENCHES

THE SOLID HANDLE WRENCH

By actual tests the strongest wrench made

This cut shows the one-piece Solid Steel Forging

No. 100, SOLBAR

The Solid Handle Wrench comprises the essential features of a perfect Screw Wrench.

Its strength is unquestioned.

It has been received with great favor, both by mechanics and the trade. Its methods of construction are fully illustrated above. The head, bar shoulder, and handle frame being forged solid of one piece and case hardened insures uniform strength and overcomes the weak point in other screw wrenches, which are liable to break at a point on the bar opposite the knurled thumb screw.

In appearance the wrench is most attractive. This wrench has been subjected to the severest tests to determine its strength and durability, and in every experiment has proved superior to any similar tool in competition.

Every wrench is fully warranted.

THE SOLID STEEL WRENCH

The cut shows all the parts used in the construction of this Wrench

No. 300, SOLID STEEL

One of the features of this Wrench is its simplicity, only three parts being used in its construction.

First, the head, bar, and handle forged solid from one piece of steel.

Second, the sliding jaw.

Third, the screw which moves the jaw on the bar of the Wrench.

Particular attention is called to the fact that the head, bar, and handle are forged solid from one piece of steel, insuring unusual strength and durability not found in any other wrench.

Subjected to the severest and most critical tests of engineers and skilled mechanics it proves its own strength and merits, and we can say without hesitation that no monkey wrench ever made has the lasting qualities and durability of this Solid Steel Wrench.

This wrench is constructed under our patents, and is most attractive, in appearance. Every wrench is fully warranted.

Page 67

SCREW WRENCHES

STRONGHOLD WRENCH No. 25

Parts for The Stronghold Wrench

- A Bar and Head, One Piece Forged Steel.
- B Slide Jaw.
- C Frame for Handle.
- D Wood Sides for Handle.
- E Screw for Slide Jaw.
- F Rivets and Washers for Holding Wood Sides to Handle.
- G Rivet for Fastening Frame to Handle.
- H End of Bar Headed as Rivet to Further Securely Hold Handle to Bar.

The Stronghold Wrench differs from our Solid Handle Wrench mainly in construction. While in the Solid Handle Wrench the Bar and Handle Frame are forged solid of one piece, in the Stronghold the Bar and Handle are of two pieces, the usual construction of other Screw or Monkey Wrenches.

The Bar and Head of the Stronghold are forged of a special grade of Steel, most suitable for the purpose. The Handle Frame is tough Malleable Iron.

Note that the Bar extends the entire length of Handle. The Handle Frame is first carefully machined to fit the Bar, and then forced on to same; held firmly in place by end riveting and a rivet through sides.

The sides of Handle are made of selected Hardwood and held securely by two Rivets headed over countersunk washers to prevent splitting of wood.

Head and Jaw are properly hardened.

The Stronghold Wrench is fully guaranteed.

SAMSON WRENCH, No. 35

Parts for the Samson Wrench

- A Bar and Head, One Piece Forged Steel.
- B Slide Jaw.
- C Malleable Handle.
- D Handle Rivets.
- E Screw for Slide Jaw.
- F End of Bar Headed as Rivet to Securely Hold Handle to Bar.

The SAMSON is the Iron Handle Wrench of the Stronghold type of superior construction to take care of all Railroad, Industrial and general requirements.

The only Wrench that is stronger or of higher value is the Solid Steel No. 300, which is a solid forging from tip to tip, made especially for the discriminating trade, who recognize its value at a slightly higher first cost.

On Iron or Steel Wrenches, specify the SAMSON or the SOLID STEEL.

MADE IN CLEVELAND

No. 45 P, ADJUSTABLE ANGLE WRENCH

A Wrench that will replace a number of Solid Wrenches in the Tool Kit. It follows the pattern of the popular Solid Engineers End Wrench, and can be used in practically every opening in which the Solid Wrench can be used.

Forged from special steel and made by skilled mechanics with many years' experience in wrench making, and designed to give the greatest possible strength. Wrenches are full polished excepting web of handle which is nicely finished in black.

For the Automobilst, Engineer, Mechanic and for general use about the home or farm,

AUTOMOBILE RIM WRENCH

No. 68

This wrench will find a ready sale among motorists and garage men. It is a sturdy, well made tool and will give long satisfactory service. The socket is case hardened and the entire tool is worthy of a place in the PEXTO line.

Size of Sockets $\frac{5}{8}$ in., $\frac{11}{16}$ in. or $\frac{3}{4}$ in.

List each \$2.00

Weight per dozen 22 lbs.

Packed $\frac{1}{2}$ dozen in a box.

THIN JAW PIPE WRENCH

No. 110

The Thin Jaw feature which we have brought out in this wrench will be found to be particularly adaptable. Many times this type of wrench may be used in narrow openings impossible to use an ordinary pipe wrench.

Mechanics and automobilists will find this wrench exceptionally useful. Made in three sizes with steel handles only.

The Little Pruning Book

Tells How to Grow Better
Fruits and Flowers by Pruning

“The Little Pruning Book” teaches the reasons for pruning and what pruning accomplishes. It tells how, when and where to prune trees and shrubs for vigorous growth. In all, there are eleven chapters of sound advice on pruning and pruning shears.

Knowing the kind of shears to get is equally as important as knowing how to use them. The advice contained in this book on the selection and care of pruning shears will make their use more satisfactory. Clipping is work at best, but nothing comes nearer making it a pleasure than Pexto Pruning Shears.

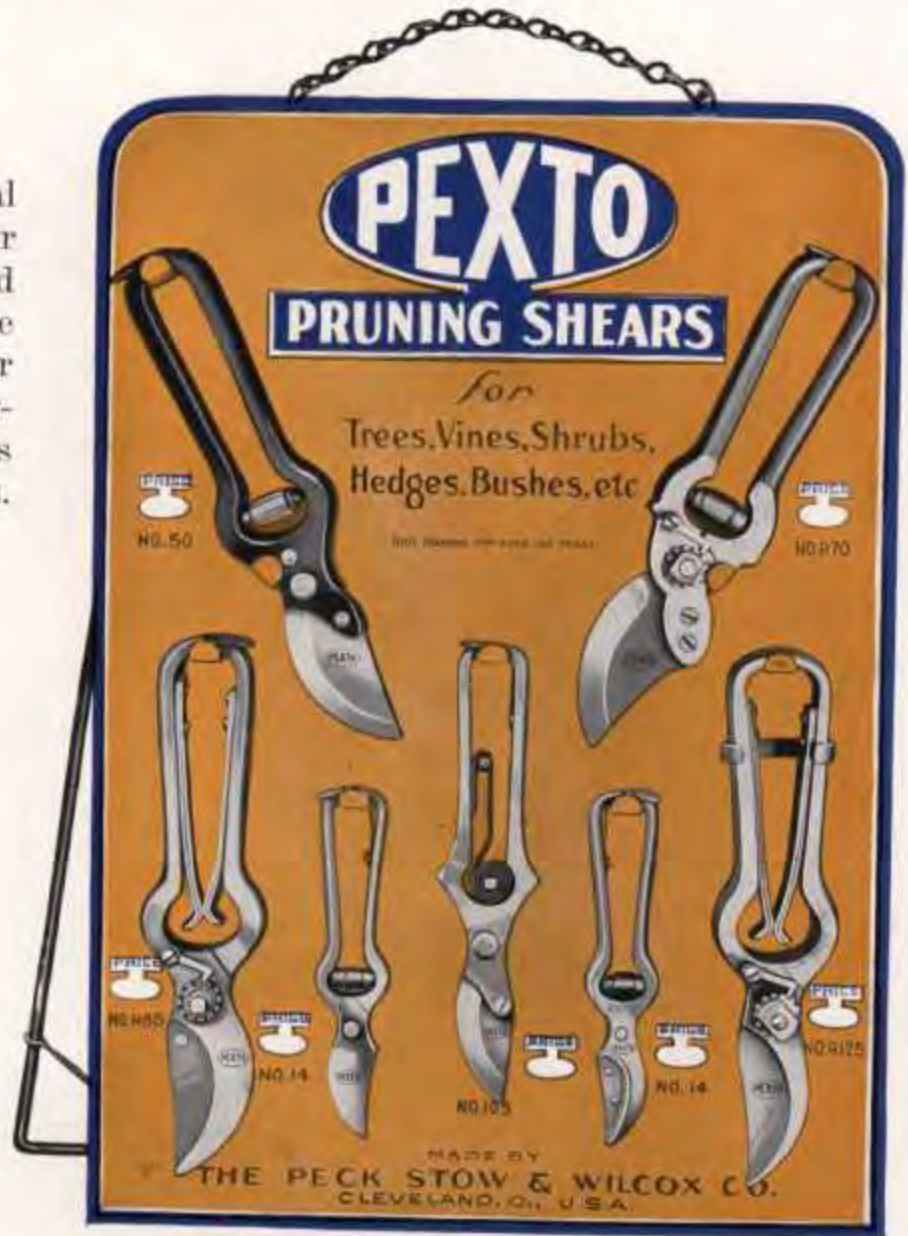

“The Little Pruning Book” is neatly bound in a light brown cardboard cover, and has hints of soft loamy soil, country lanes and gardens of old fashioned flowers. It is an attractive addition to any library.

DISTRIBUTED BY THE PECK, STOW & WILCOX CO., CLEVELAND, OHIO.

ASSORTMENT No. 1

More Rose Shear Business

No. 14, 6-inch, Ladies' Rose and Pruning Shears

Made in 6-inch size only. Packed one dozen in a cardboard box with the (six shear) display illustrated above. One gross in a case. Each shear wrapped in anti-rust paper.

LIKE an efficient, well dressed, snappy, salesman this practical Ladies' Rose Shear Display will get the results and quickly pay for every cent you invest in it.

Stand it on your counters, display tables, or windows; it occupies small space and does a big business. Lithographed in four bright colors it immediately attracts favorable attention, and the Pexto Rose Shears cinch the sale. All without effort on your part and with practically no sales expense.

This display is furnished with each dozen Pexto Ladies' Rose Shears. It comes to you in a compact container, all ready for business. Occupies a space only 6" x 6". It is a sturdy, solid, substantial display.

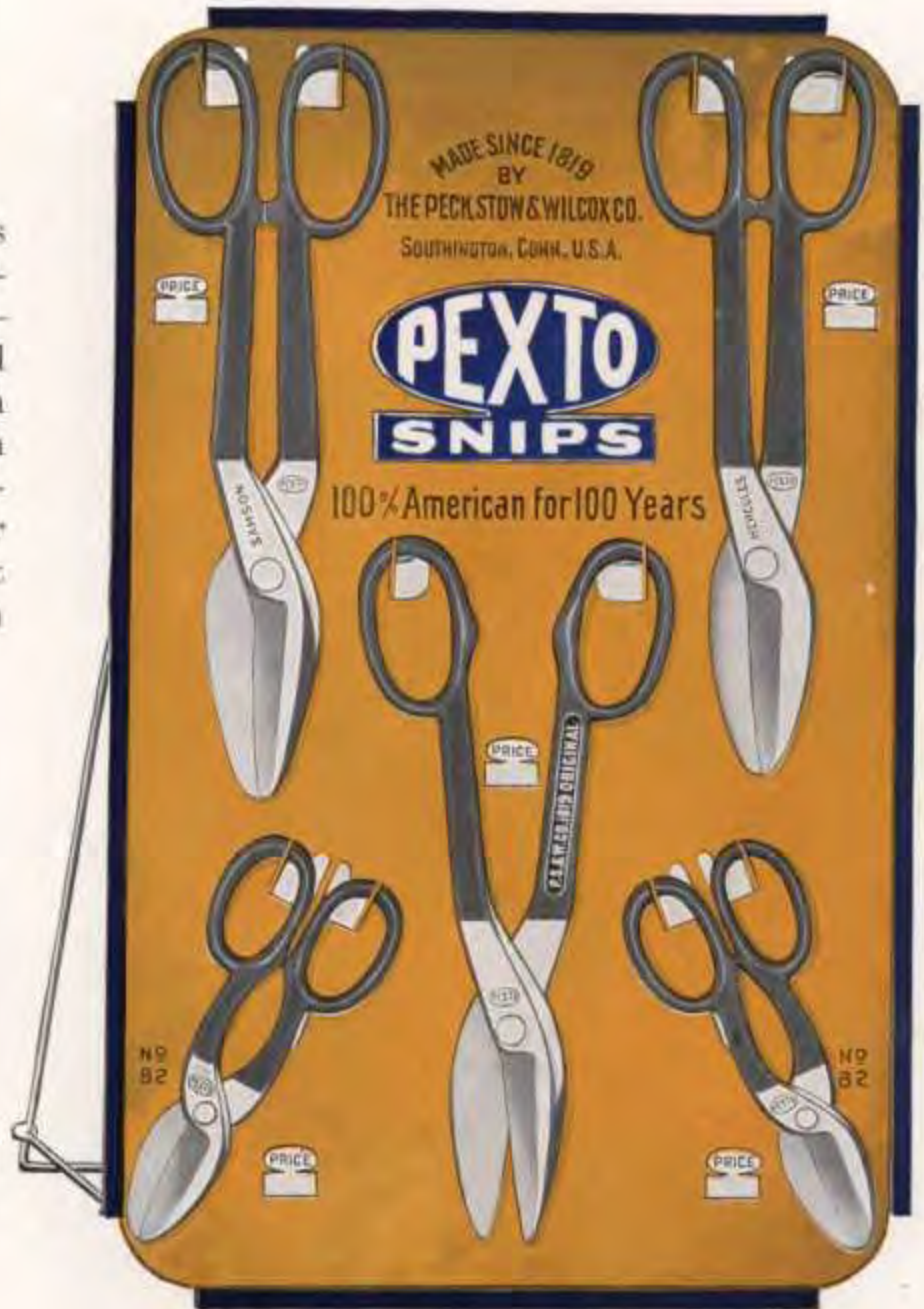

Good Because Pexto

Without question Pexto Ladies' Rose Shears are the finest quality made, far superior to imported shears. They are forged from high grade steel, polished and nickel plated. The attractive finish and handy size make them particularly desirable. By a special patent attachment on the upper knife the *rose stem is held after cutting*. This Pexto advantage will surely appeal to your customers. These shears are equally satisfactory for light pruning.

ASSORTMENT No. 4

MADE IN SOUTHWINGTON

ROSE TOOLS, INC.

SNIPS

IN the manufacture of PEXTO Snips, no detail of design or construction that would add to their excellence has been omitted. From their well-shaped handles to the ends of their clean-cutting blades, they are as nearly perfect as highest-grade material and highest-class workmanship can make them.

The PEXTO line includes twenty-five styles with different sizes of each, covering every type of well-known and practical shear on the American market, adapted to all the needs of every Snip user. For the tinsmith, mechanic, automobilist, or for farm and home use.

PEXTO Snips have been famous since the line was originated in 1819. The maker's reputation is built upon a century of excellent tool service in the hands of various classes of users the world over.

While we always advocate the purchase and use of the highest quality Snip, the user is always assured of the best possible value for his money when specifying the PEXTO Brand.

THE LYON SNIP

Improved

For Cutting Scrolls and Circles

Finish—Blued Handles and Polished Head

A snip that has always been popular because the user knows that he can get the best results from the famous Pexto make. These Snips are especially adapted to cornice and tin work. They are made to cut circles, scrolls, etc., very easily, but they are equally well adapted for regular snip work. The blades are rounding to give clearance and can be used for very delicate work. Best materials with forged handles and steel blades are used and the tool is fully warranted.

Each Snip wrapped separately, and packed one gross to a case.

No. 321 SPRING HANDLES

Same as No. 121 series, but fitted with spring handles and clip, similar to a Pruning Shear.

Number	321	322	323	324	325
List per dozen	\$21.40	19.50	18.50	17.30	17.00

Each Snip wrapped separately, and packed one gross to a case.

POCKET SNIPS

GENERAL PURPOSE POCKET SNIP

Finish—Blued or Japanned Handles and Polished Heads

Blued Handles, furnished unless specified Japanned

With the assurance of Pexto quality added to its manifold uses, this tool cannot be surpassed. It is adapted to use by the mechanic, plumber, electrician and automobilist. The Tinsmith and Sheet Metal Worker will find it a very useful, vest pocket shear.

Number	82
Length of cut, inches	2
Length over all, inches	7
Weight, lbs. per dozen	6
List, per dozen	\$15.90

Packed one in an envelope, six pairs in a box.

One gross in a case.

HAND SNIPS

JEWELERS' SNIP

Finish—Blued Handles and Polished Heads

Of especially high-grade, solid forged steel, these Snips are finely finished and are especially adapted for general use. They bear the Pexto guaranteed trade mark and are in every way suited to the needs for which they are intended.

Number	011
Length of cut, inches	1 $\frac{3}{4}$
Length over all, inches	8
Weight, lbs. per dozen	6
List, per dozen	\$17.60

Packed one in a carton

TINNERS' HAND SNIPS

TROJAN, SHARP POINTED SNIP
Improved

Finish—Blued Handles and Polished Heads

This style of Snip has many varied uses. Forged from high-grade steel and bearing our guaranteed trade mark. They are most serviceable for cutting sheet metal and lighter materials such as paste-board, mica, linoleum, veneering, etc. They will cut straight or curved lines, and may be used for scroll or cornice work so that their uses are almost unlimited.

Number	79
Will cut Iron Gauge No.	26
Length of cut, inches	2½

Weight, lbs. per dozen	19	16½	9½
List, per dozen	\$7.90	7.30	6.70

Packed six in a carton

TINNERS' HAND SNIPS

HAWK'S BILL COMBINATION SCROLL AND CIRCULAR SNIP

Finish—Blued Handles and Polished Heads

A High-Grade Snip with an extremely wide range of cutting usefulness, possessing a combination of individual features not found in any other Snip.

Work can be cut on a straight line, and they will cut circles or the radii of a circle in very much smaller dimensions than it is possible to cut with any other Snip on the inside as well as on the outside of a sheet of metal.

The blades are hawk billed in shape and have a peculiar clearance bevel between the cutting edges, which permits the blades to easily turn a sharp corner or work around a small curve without buckling. The blades being unusually narrow and ground to an extreme narrowness at the points, they are highly valuable for cutting openings in pipe or cylinders of every description for furnace jackets, thimbles, tee joints, etc.

They are especially adapted for cornice work practice in tight places where the regular Hand Snip proves cumbersome.

Best materials with forged handles and steel blades are used.

Number	15
Will cut Iron, No.	28
Length of cut, inches	3
Length over all, inches	11 $\frac{3}{4}$
Weight, lbs.	1 $\frac{1}{4}$
List, each	\$5.00

DOUBLE CUTTING SHEARS

Nos. 2A-02A-22

Berridge Patent Double Cutting Shears

Finish—Black Handles and Polished Heads

DOUBLE CUTTING SHEARS NOS. 2A AND 22

CRIMPED PIPE ATTACHMENT FITTED TO SHEARS NO. 2A

OLD METHOD

Pexto Berridge Patent Double Cutting Shears are improved in quality, finish and design.

The same good qualities and workmanship as in Pexto Hand Snips which has made them superior to shears of other makes will be found in these Double Cutting Shears.

The Handles are Malleable Iron and the Blade is Forged Steel with hardened cutting edge. Great care is exercised in assembling for permitting a joint of pipe to be cut with ease and accuracy, leaving the edges smooth and clean.

Number	2A	02A	22
Weight, lbs. per dozen	36	36	12
Length over all, inches	12 $\frac{3}{4}$	12 $\frac{3}{4}$	8 $\frac{1}{2}$
List, per dozen	\$54.00	50.00	40.80

NOTE—No. 02A are the same as No. 2A except that they do not have the crimping attachment.

No. 22 is the same as the No. 02A but is in the Pocket size.

Packed one in a carton

BENCH SHEARS

TINNERS' BENCH SHEARS

Finish—Black Handles and Polished Heads

As regularly made, bench shears have a right hand cut with the lower blade on the right side of the shear. These shears are much larger than the ordinary tinner's hand shears. Pexto Bench Shears are made of the high-grade metals and with the same skilled workmanship as characterizes the entire line.

SLITTING SHEARS

HAND SLITTING SHEARS

Finish—Blued Handles and Polished Heads

Made of a special design intended for cutting corrugated metal lengthwise. These Shears are equally adapted for the same class of work as regular Snips. Both handles remain above the work and the Shears are so shaped that the cut sheets pass freely below the hand without danger of injury. Forged from best Norway Iron and laid with highest grade steel.

SAW TOOTH BLADE, HAND SLITTING SHEARS

For Wire Screen and Poultry Wire Cutting

Finish—Blued Handles and Polished Heads

These Shears are the only ones of their kind of correct design intended for cutting wire screen, poultry wire or composition materials of special texture which the ordinary Hand Snip will not cut. Saw teeth are cut in the lower blade and the handles are so shaped that the cut sheets pass freely below the hand without danger of injury, an advantage especially in cutting wire screen and poultry netting. Forged from best Norway Iron and laid with highest grade steel.

Page 80

TINNERS' HAND SNIPS

No. 14 "BULLDOG" TYPE

Finish—Blued Handles and Polished Head

A heavy Snip designed for cutting the heavier gauges of iron for which the ordinary snip is not adapted. The long handles on this snip offer great leverage. The jaws are extra heavy and the cutting edges are steel laid. A nicely balanced, drop forged Snip, unsurpassed where the requirements call for the cutting of a heavy metal.

Sheet Metal Workers' Manual

Mr. L. Broemel, for many years active with The Peck, Stow & Wilcox Co., foremost manufacturers of sheet metal working machinery, and Professor J. S. Daugherty, Instructor in Sheet Metal Work in the School of Applied Industries, Carnegie Institute of Technology, Pittsburgh, Pa., are the principal writers, with contributions from the Federal Board for Vocational Education, Washington, D. C., and manufacturers well known in the industrial field and prominent in the sheet metal industry.

Pattern drafting is a big feature of this book, but most important, the pattern secured, it shows how to develop the work with modern machines and tools and such other mechanical appliances as are used. How to perfect all manner of seams and joints in sheet metal work is fully illustrated. A thorough course, fully illustrated, is given in the processes of soldering, brazing, oxy-acetylene welding, electric welding, and hand forging and welding. Crimping, beading, edging, folding, turning, wiring, straight, circular and irregular cutting are operations that enter into sheet metal construction extensively and these operations are described and illustrated in order. A whole chapter is given up to the importance of the sheet metal industry and to sheet metal working machine and tool construction, their application and uses, describing their adjusting features with every important feature of each machine marked according to trade terms used—valuable information for the buyer as well as for the operator.

Over four hundred illustrations are reproduced from actual drawings and photographs and each subject is described in as practical and non-technical manner as possible.

Distributed by The Peck, Stow & Wilcox Company, Southington, Conn.

Essentials of Sheet Metal Work and Pattern Drafting

By James S. Daugherty

Instructor in Sheet Metal Work, School of Applied Industries, Carnegie
Institute of Technology, Pittsburgh.

An authoritative course in practical sheet metal work and pattern drafting in text form for industrial teachers, students, apprentices, sheet metal workers and others interested in this subject.

The course is outlined and the problems are presented in such sequence that the processes and machine operations are reviewed with each new problem. In presenting these problems, the author has followed the lines of the best shop methods, derived from years of experience in teaching the subject and as a practical sheet metal worker.

The book tells how to transfer patterns to metal; how to cut patterns and templates; explains the process of seaming; treats of the various processes used in the construction of conductor pipes, stove pipe, furnace pipe and air ducts. It teaches radial and parallel line development; shows how to make pipe intersection, tee joints, elbows, and the various other forms of construction with which the sheet metal worker must be familiar.

Distributed by The Peck, Stow & Wilcox Company, Southington, Conn.

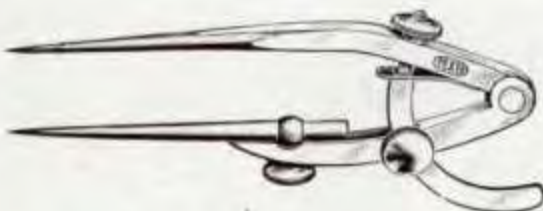

Miscellaneous Hand Tools

IN addition to our regular line of Braces, Chisels, Pliers, etc., which are shown in the preceding pages, we manufacture a line of miscellaneous hand tools for workmen in various trades.

This line includes Calipers, Dividers and Compasses, Ratchet Drills, Tin and Blacksmithing Tools, Screw Drivers, Vises, Clamps, Soldering Tools, etc.

Like all "PEXTO" products these tools are made from high grade material by skilled workmen, are finished in the best possible manner, and are guaranteed to give entire satisfaction.

EXTENSION DIVIDERS

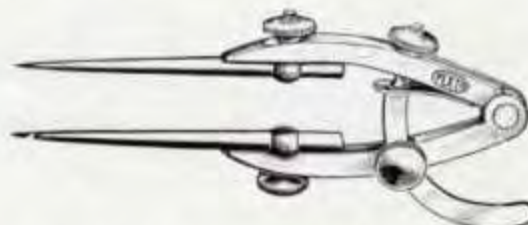

SINGLE LEG, ONE MOVABLE POINT

Forged, Tempered and Steel Pointed

The above cut illustrates our forged steel Extension Dividers with one movable leg or point which can be lengthened or shortened as required or a pencil may be substituted in its place if desired. The attachment that holds the movable leg or pencil secures it firmly in place, and is easily adjusted.

RATCHET DRILLS

REVERSIBLE

Sectional View of Whitney Reversible Ratchet Drills.

All Whitney Ratchet Drills are encased. The Holder "A" is held in place rigidly and securely by the Collar "B." This Collar is machined accurately to size of Groove in Holder, then broken, placed in Groove of Holder and held in place by a Set Screw. This principle of fastening Holder in Head "EE" is a simple mechanical achievement, giving rigidity and true alignment to the entire tool, and at the same time protecting the interior working parts from dust, grit, or other foreign matter.

The Feed Screw "D," when released by Check Nut "C," forces Sleeves or Drills from Holder; a Drift is therefore unnecessary. When Ratchet is in use, Screw "D" is slightly above end of Sleeve or Drill, and Check Nut "C" is screwed down tightly and on to top of Holder.

The Lever "E" is solid, not made of tubing or drilled the entire length to hold Pawl. We provide an extra heavy offset Casing "EE" for holding Pawl mechanism, giving additional strength to Head "F." Lever, Head and Casing are solid and of one piece.

All Parts in our Ratchets are interchangeable and worn-out parts can be readily replaced.

FINISH

Lever and Head are finished in Gun Barrel Blue; other parts are Bright. This combination is very attractive and practical.

In ordering please give name of part wanted as indicated above and also the number of ratchet for which it is wanted.

BLACKSMITHS' SHOEING PINCERS

SOLID STEEL, WITH POLISHED STEEL JAWS

We call the special attention of all users of Shoeing Pincers to the exceptional style and finish of these Pincers, which, combined with their quality, make them the equal, if not the superior, of any shoeing pincer made. They are solid steel finely polished, and are a perfect tool in every respect.

No. 10—10 inches, weight 19 lbs.	List per dozen	\$8.75
No. 12—12 inches, weight 22 lbs.	List per dozen	9.25
No. 14—14 inches, weight 24 lbs.	List per dozen	10.25

In boxes of one each.

SHOE PINCER

No. 56

This pincer is made especially for shoe-makers but it will prove a handy tool for numerous uses about the home, farm and garage.

It is forged steel throughout, has polished face and black handles as illustrated.

Size 6 in. only. List per dozen..... \$7.20
Weight per dozen 7 lbs.

Packed $\frac{1}{2}$ dozen in a box.
One Gross in a case.

MADE IN SOUTHINGTON

Page 91

CUTTING NIPPERS

IMPROVED CUTTING NIPPERS

The Jaws of these Nippers are made from best cast steel, and each Nipper is tested by cutting steel wire before leaving the factory. The long Handles give so great a leverage that they are liable to abuse by twisting and prying, and if any such breakage occurs it will be assumed it happened from unfair usage.

- No. 0—14 inches long; width of Jaws 2 inches; weight per dozen 41½ lbs. List each \$5.70
 No. 1—12 inches long; width of Jaws 1½ inches; weight per dozen 27 lbs. List each.. 3.50
 No. 3—10 inches long; width of Jaws 1¼ inches; weight per dozen 17 lbs. List each.. 2.60
 No. 4— 8 inches long; width of Jaws 1⅜ inches; weight per dozen 10 lbs. List each.. 2.40

CARPENTERS' PINCERS

No. 50

Forged Steel, Hammer Head Pattern. Full polished head, as shown and polished screw driver and claw ends. Handles in smooth permanent black finish.

For style and finish, combined with quality, this Pincer has no superior and few equals.

Inches.....	6	7	8	9	10	12
Weight, lbs. per doz.	5	6½	10	10½	15½	18½
List per dozen..	\$8.45	10.25	10.80	12.40	13.85	15.85

In boxes of one-half dozen each.
 Twelve dozen in a case.

CARPENTERS' PINCERS

No. 60

Exactly the same as No. 50, except that it has the wire cutter as shown between the jaws.

Inches.....	6	7	8	9	10	12
Weight, lbs. per doz.	5	6½	10	10½	15½	18½
List per dozen..	\$8.80	10.60	11.15	12.80	14.20	16.20

In boxes of one-half dozen each.
 Twelve dozen in a case.

No. 70

Exactly the same as No. 50, except that it has polished face only. All other parts black finish.

Inches.....	6	7	8	9	10	12
Weight, lbs. per doz.	5	6½	10	10½	15½	18½
List per dozen..	\$7.20	9.00	9.90	11.50	12.60	14.40

In boxes of one-half dozen each.
 Twelve dozen in a case.

No. 80

Although not as high quality or finish as our No. 50 or No. 60 forged steel Pincers, this No. 80 Pincer presents exceptional value. It is forged steel tool, all black finish, except polished face. Six inch has plain handles, other sizes as shown.

Inches.....	6	7	8	10	12
Weight, lbs. per dozen	4¾	6½	9¾	13	15¾
List per dozen	\$7.20	1.00	9.90	12.60	14.40

In boxes of one-half dozen each.
 Twelve dozen in a case.

CUTTING NIPPERS

WITH REMOVABLE JAWS.

Each of the jaws has two fine cutting edges.

These are held in place by two screws and are consequently easily reversible, adjustable and interchangeable; yet the construction, as shown in cut, is such that the jaws are unusually strong.

With two fine cutting edges to each blade, these nippers give double value at a single price.

Numbers	0	1	3	4	5

ASSORTMENT No. 9
PEXTO SOLBAR SCREW DRIVERS

THE Display Fixture is metal and is lithographed in four colors—orange, blue, black and white. It is equipped with wire easel for standing on the counter or in the window and chain hanger for hanging on the wall. It has spring clip ledge which prevents Screw Drivers from falling off. It is sent gratis with each Assortment.

The No. 3 Solbar Screw Drivers are solid steel bar construction; round shank, polished; stained fluted hardwood handle, fastened with two large head steel rivets; especially adapted to the needs of automobilists, mechanics and for use about the store and home.

PEXTO IS YOUR
GUARANTEE
OF
QUALITY

Size 9" x 12"

The Assortment consists of twenty-four Pexto No. 3 Solbar Screw Drivers, six of which can be mounted on the Display Fixture. The Screw Drivers displayed are the most popular sizes.

The Assortment is No. 9. Order by number. It consists of the following Pexto No. 3 Solbar Screw Drivers:—

Two only—2 inch.
Four only—3 inch.
Four only—4 inch.

Six only—5 inch.
Six only—6 inch.
Two only—7 inch.

The Display Fixture is packed in a corrugated box, the Screw Drivers each size separately in cardboard boxes.

The Display and Assortment complete in a corrugated carton, size 17"x10 $\frac{3}{4}$ "x5", weight 15 lbs.

Order an Assortment, the Display Fixture comes no charge.

MADE IN SOUTHTON

ROSE TOOLS, INC.

SCREW DRIVERS

No. 3

SOLBAR SCREW DRIVER

Solid Steel Construction. Fitted with Round Fluted Handle securely held in place by two heavy flush Rivets so that it cannot slip on the bar.

This is the only style of handle that fits the hand perfectly.

Note the heavy bevelled shoulder. The only tool of its kind with such a special feature to prevent the hand slipping down the rod.

No. 10

SOLSHANK CARPENTERS' SCREW DRIVER

A very strong and durable tool on which the blade, shank and head are forged from one piece of special steel.

The blade extends completely through the Handle and forms a metal crown at the end. It is held securely in place by a rivet which passes through the ferrule, handle and shank.

Blade and ferrule are nicely polished. Handles are round, heavily fluted and have black rubberoid finish.

SCREW DRIVER BITS

Forged Steel, Polished Blades and Shanks

These Bits are thoroughly reliable. They are forged from a high grade of steel, shanks are well shaped, so as to fit any standard bit brace. They are carefully tempered, well finished, and are in no way to be compared with a cheap article which is often sold.

They are sold by the dozen, or in sets, including one of each size.

SLATERS' TOOLS

These tools used extensively in the Laying and Repairing of Slate and other kinds of roofing are drop forged from the Highest Grade materials. The Blade of the Ripper is drawn down very thin from tool steel, having a Forged Handle. Hammers are made of Solid Forgings from crucible steel, with properly tempered head, point and cutting edges. A Leather Handle that will not break or wear out easily, smoothly finished to fit the hand snugly is used on our Slater's Hammer.

RIPPERS

PUNCH

No. 989 List each	.35
-------------------------	-----

SHEET METAL REAMER AND SOCKET WRENCH

No. 792

The Reamer is forged from a high-grade steel properly hardened and tempered, drawn to a sharp, hard point for pricking through light material and reaming holes to ordinary size required for fitting dampers in pipe and for general rough punching, where a Hand Punch is not available. It will prove a handy and desirable tool around the shop and on jobs outside of the shop for enlarging holes already punched using the handle of the Reamer as a useful Socket Wrench.

The handle is of malleable iron, made up in a Socket Wrench with ½-inch and ¾-inch square hole.

Weight, lbs. per dozen	6
Length Tool Over all, inches	7
Length Reamer Over All, inches	5¾
Length Reamer, inches	4¼
Length Handle, inches	4
List per dozen	\$15.00

Packed one-half dozen in cardboard box.

HAND PIPE CRIMPER

No. 788

Capacity—No. 26 gauge Iron and Lighter.

In the shop and particularly on outside jobs no kit is complete without this handy tool. To crimp a piece of pipe with machine-like effect and precision simply slip the end of the pipe between the crimping rolls. Close the rolls by pushing down lever. With an up-and-down movement of the handle, by means of a ratchet, the rolls rotate, making a perfect crimp. Depth of crimp is regulated by adjustment of the set screw.

Well constructed, easyworking, simple to operate.

Number	788
Weight, lbs. each	1 7/8
Length over all, inches	8
List, each	\$9.00

Packed one in a box.

HAND GROOVERS

Finish—Polished head, Blued Body.

Pexto Hand Groovers are forged from a special, tough, high-grade steel.

The Heads are hardened and highly polished.

SOLDERING COPPERS

Drawn Copper Bolts, Forged

With Square Points for Common Use

Pexto Coppers are made of Drawn Copper Bolts of the best quality, and are shaped under a hammer. By this method they are as solid as the metal can be made, are better heat retainers and should not be compared with such as are cast from copper ingots.

The price quoted is a base price including all Coppers weighing 3 pounds per pair or more. Coppers of less weight take an additional net price as named below.

Nos.	1	1½	2	2½	3	4	5
Weight, lbs. per pair	1	1½	2	2½	3	4	5
Nos.	6	7	8	10	12	14	
Weight, lbs. per pair	6	7	8	10	12	14	

Standard Extras for sizes are as below.

- 4 lbs. per pair and heavier take Base Price.
- 3 lbs. per pair add 2 cents extra to Base Price.
- 2½ lbs. per pair add 5 cents extra to Base Price.
- 2 lbs. per pair add 8 cents extra to Base Price.
- 1½ lbs. per pair add 14 cents extra to Base Price.
- 1 lb. per pair add 20 cents extra to Base Price.

Packed in cases of 25 pair each.

SOLDERING SETS

FAMILY SOLDERING SET

This little outfit will be found very convenient for household or family use. Each set is complete, and consists of a Soldering Copper, Solder, Rosin and a Scraper.

No. 11—Family Soldering Sets. List per dozen Sets \$11.00

Weight, per dozen set 11 lbs.

Packed one set in cardboard box.

MADE IN SOUTHINGTON

HATCHET COPPERS, SWIVEL HANDLES

'TINNERS' STEEL RULE

Section of Tinner's Rule. Entire Length, One Yard.

This Tinner's Rule is an invaluable article for any practical tinner, and the cut is an exact representation, so far as shown; its entire length is 36 inches. The upper line is the ordinary rule graduated by eighths of an inch. The lower line shows at a glance the exact circumference of any cylinder by simply ascertaining the diameter, i. e., a vessel 5 inches in diameter the rule indicates to be 15 $\frac{1}{4}$ inches in circumference.

The reverse side contains much useful information, in large, plain figures, regarding the sizes of sixty different articles, such as cans, measures, pails, etc., with straight or flaring sides, flat or pitched top, liquid and dry measure in quarts, gallons and bushels. First is given the dimensions for vessels holding 1 to 5 gallons, liquid measure; second, $\frac{1}{4}$ to 2 bushels, dry measure; third, cans with pitched top, 1 to 10 gallons; fourth, cans with flat top, 1 to 200 gallons; fifth vessels holding 1 to 8 quarts and $\frac{1}{4}$ bushel to 3 bushels, dry measure.

No. 101—Tinner's Rule, Polished.	List each	\$4.10
No. 107—Tinner's Rule, Nickel Plated.	List each	5.00

In packages of one only.

WIRED

- No. 31—Soldering Copper Handles. Weight per dozen 1¼ lbs. List per dozen \$0.50
 Packed in bulk as ordered.

AUGER HANDLE

No. 75

White Waxed Handles, Metal Parts, Polished

A one piece handle, 1¾ inches in diameter and 17½ inches long. Fitted with steel center plates giving a perfect, sure grip on drill shanks from the smallest to the largest size ship auger bits which are used for hand drilling.

The plates grip the drill at top, bottom and center, giving at least 2 contact points on even the smallest shanks, at the same time preventing the shank from slipping through plate when extracting the auger from the hole.

Metal plates are held together by two bolts, with washers and wing nuts, nickel plated. This feature is so designed that both hands may be used for holding the tool in position tightening the clamps at same time.

No. 75—17½ inches long; weight 20 lbs.

List, per dozen \$11.80

In boxes of one-half dozen each.

In cases of six dozen; weight 154 lbs.

PECK'S PATENT

Iron Bound, Strong and Durable

This handle is adjustable to all sizes of Augers. The small cut shows the iron clamp, which is firmly inserted in the wooden handle and holds securely the Auger.

No. 60—Length 18 inches; weight 13 lbs.

List per dozen \$8.50

In packages of one-half dozen each.

In cases of six dozen; weight 90 lbs.
